1 Introduction

1.1 Background to the problem

It is now clear that Makerere University which is Ugandas oldest university that was closed for nearly two months after a staff strike, reopened on Monday 2nd January 2017. This is not the first time the public university, the oldest and largest institution of higher learning in Uganda is closed after a strike.

The current staff strike and student commotions at Makerere University are a tip of an iceberg. Staff and student activisms cannot be resolved by reghting them with Police or other security forces. Fundamental causes of these strikes and the current governance problems must be studied, analyzed and addressed to resolve current problems in our university system.

1.1.1 Problem Statement

The main objective of this data collection concept is to use data collected from cause of strikes, period of strikes, main participants and location to figure out how to help curb down and reduce the rate of instabilities, troubles and strikes in Makerere University.

2 Aims and Objectives

2.1 Aim or general objective

The main aim of this research is to help devise means to help curb down and reduce the rate of instabilities, troubles and strikes in Makerere University

2.1.1 Specific Objectives

- Reduce the rate of strikes and instabilities

- Improve the education environment

- Improve the welfare of lecturers

- Improve the academic performance of students

- Improve the social welfare of non-teaching staff

- To vow for good service delivery

- To enable students be able to easily pay tuition fees

3   Research Scope

My research scope covers the entire makerere university community which includes several schools and colleges basically the students who are the biggest stakeholders, lecturers and the non-teaching staff of the mighty university.

4   Research Significance

This research is basically to help resolve and curb down the continuous instabilities and strikes that have been rampant at the university over the years.

5   Methodology

- I used basic research generates new knowledge to deal with major unresolved problems in society.

- I used applied research to identify immediate/priority problems, evaluate policies aimed at delivering the greatest benefit at minimum cost, for instance, making optimal use of resources.

- I used quantitative research establishes the cause-effect relationship.
